Subject: Griffiss AFB Response to Comments PFC Base-wide SI Work Plan

Dave,

The Air Force Response to Comments is acceptable.

However, during our review it was noted that in the table in QAPP #20 (pg 34), some of the total sample numbers in the last row appear to be miscalculated (*Grand Total: Regular samples should be 236, Field Blanks should be 9*). We did not look to see if this was repeated elsewhere.

If you have any questions please let me know. Thanks. Good luck in the field!

Bob
